In November 2020, FCLTGlobal led "Workshop on Navigating Responsibilities of Long-term Investors", a working session at ICPM's Virtual Fall Discussion Forum to explore questions about investors' evolving responsibilities.

- What are some of the new or emerging responsibilities for global investors?
- Who are the key influencers in advocating for new responsibilities?
- Are there challenging trade-offs in accepting these responsibilities? Can a responsibility be eliminated once accepted?

Session participants completed a worksheet (below) to answer those questions and launch discussion within their own organizations.
